

Our mission statement

PRONATEC has been a pioneer in the global organic and fair trade movement for more than 45 years. We supply our international customers in the food and cosmetics industries with premium-quality, certified ingredients. Our focus is however not only on the production and distribution of high-quality ingredients and semi-finished products in terms of food safety, but also in terms of their ecological and social impact. Considerate behaviour towards customers, producers, business partners, consumers and the environment is at the very heart of our business. We maintain personal and long-standing relationships with the smallholder farmers and support them from the cultivation to the marketing of their goods at a profitable price. By giving our best every day to supply our customers with healthy, sustainably produced food, we not only make a difference in the lives of the farming families in the countries of origin of our products but also make our contribution to solving the global environmental challenges, which concern all of us. The PRONATEC team pursues the further development of our sustainable range of products and the fulfilment of our customers' needs with great enthusiasm and a spirit of innovation.

PRONATEC is committed to sustainable development along its entire value chain. In doing so, ecological, economic and social aspects are given equal consideration. The owner-run Swiss family company relies on a unique network of organic and fair trade certified companies, which is continuously reviewed and expanded. Width and volume of the certified product range is constantly growing. In order to achieve our ambitious goals, we maintain trade relations that are based on trust and encourage the exchange of knowledge and best-practice in our network along the entire value chain, from the origin to the sale of the end products.
